

ASCOJET 2001RX

Dry Ice Blasting Unit

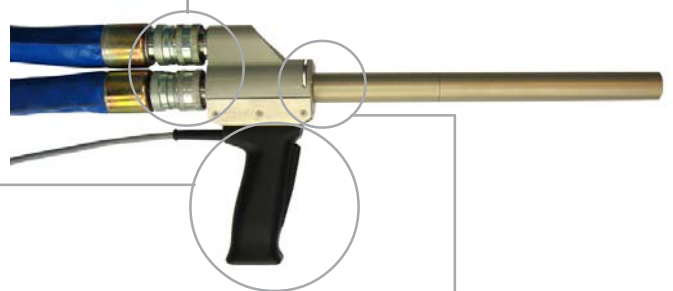

The **ASCOJET 2001RX** is a compact, mobile dry ice blasting unit featuring a very powerful double hose system. The **ASCOJET 2001RX** is **ASCO's** most powerful dry ice blasting machine providing maximum profit from saved cleaning and down time.

This powerful unit is suitable for cleaning companies or industrial end users like foundries, tyre manufacturers, the food industry and the printing industry who require maximum performance.

Powerful and handy blasting gun:

Thanks to a quick connect coupling the gun can be very easily attached to the blasting unit.

A quick exchange system allows nozzles to be changed within seconds without any tools.

The ergonomic gun handle ensures very easy handling and comfortable operation when blasting over longer periods. The safety switch prevents unintended blasting release.

ASCOJET 2001RX

Technical Specifications

Dimensions (lxwxh) (incl. wheels and handle):	670 x 700 x 1000 mm
Weight empty:	approx. 75 kg
Content of pellet hopper:	approx. 24 kg
Blasting pressure:	0 - 16 bar (adjustable)
Transport pressure:	0 - 10 bar (adjustable)
Dry ice consumption:	30 - 100 kg/h (stepless)
Voltage:	230 V, 50/60 Hz, 1 Ph (other voltages on request)
Power consumption:	600 W nominal
Connection:	Input: 1" BSP

ASCO  Swiss made

Special Features:

Powerful and handy blasting gun with quick connect coupling

Double hose system for maximum performance

Separate regulation for blasting and transport air

Lightweight and compact

Highly manoeuvrable

Box for gun, nozzles and tools

Distributor unit for pulsation-free blasting

Integrated holding device for hose

Control panel for easy overview
